WORK EXPERIENCE

ITSECTOR – SISTEMAS DE INFORMACAO, SA, PORTO

Project:

- Credit Brokers – Millennium BCP
 - DECEMBER 2024 – PRESENT

Roles:

- SOFTWARE DEVELOPER – IS CONSULTANT II
 - April 2025 – Present

Stacks:

ReactJS · TypeScript · Module Federation · Zustand · Azure DevOps · Scrum

Scope:

- As a Team Leader, I lead the front-end development and the consolidation of the solution's architecture, ensuring an efficient and scalable structure for this Millennium BCP backoffice platform, dedicated to managing credit brokers and currently under development.
- Definition and implementation of a modular architecture based on micro frontends using Module Federation
- Development of interfaces with ReactJS and TypeScript, ensuring performance and component reusability
- State management with Zustand, tailored to complex applications with high interactivity
- Collaboration with stakeholders and tech leads to ensure technical and functional alignment of the solution
- Use of Azure DevOps for CI/CD, version control, and sprint management in a Scrum environment
- Collaboration with back-end and UI/UX teams to ensure functional and visual consistency
- Technical support and validation of team deliveries, promoting best practices and knowledge sharing
